

Amir Hever - CEO & Co-Founder

Amir Hever is the CEO and co-founder of UVeye, the deep learning computer vision startup that is setting the global standard for vehicle inspection with fast and accurate anomaly detection to identify issues or threats facing the automotive and security industries.

Hever co-founded UVeye in June 2016 along with his brother Ohad, who serves as the COO. With an extensive background of over 10 years working in the field of computer vision, UVeye is Hever's third venture. He previously held the position of VP R&D at Visualead which was acquired by Alibaba.

There he created technology to improve interactions between people and brands through mobile innovation. Prior to Visualead, he worked with CorrelSense, an enterprise-application performance-management (APM) company.
